

Round Pipe Hydraulic Notching Machine

Categories	Round Pipe Hydraulic Notching Machine
Brand	BendTech Engineers (Brand Name - BTE)
Model	BTE-HPNM
Condition	New
Raw Material	Round Pipe
Material / Metal Processed	carbon steel, stainless steel, copper, aluminium, galvanized, etc.
Power	Electrical
Automation	Automatic
After-sales Service Provided	Engineers available to service machinery overseas
Operation	By Push Button
FOB port	Mundra Port(Gujarat) , Nalva sheva Port(Maharashtra)

Enquiry

Pipe Notching Machine is commonly preferred before joining light gauge Tubes & Pipes to make a tee or Similar joint, as by Welding. Either one or both tubes may be notched before assembly.

BendTech Engineers Double Acting Hydraulic Notching Machine have been expanded and to include precise & Sharp Notch of pipe & Ease of Removing Cutting Chips. Easy and fast PLC Based operation gives best cutting quality with lowest Maintenance of the machine.

Advantages

- Fast & Economical
- For All materials : Pipe Notcher grinds square, rectangular, & all other tube section, The machine suitable for all types of material & Thickness.
- Any Diameter : Bending supplies wide range of Grinding Rollers from 15 mm to 75 mm

Applications

- This notching machine is widely used for notching for aluminum ladders profiles, steel guardrail, zinc steel fence, iron guard fence, aluminum alloy shelf bracket, handrail, balustrade, railing, banisters
- Available for different material, including aluminum profile, stainless steel tube, mild steel pipe, iron pipe, copper tube, etc.

Specifications

It is equipped with different notching molds. Reasonable design notch and die set, to prevent the scratch on the tube surface. The whole machine must be processed by gantry milling to ensure high precision performance. notching power is driven by the hydraulic unit with auto-cooling system. This machinery is a manual notching machine which available for the most convenient operation and economic consideration.

- No scratch on the surface of metal tube and pipe, reasonable designing notch and die set to preventing scratch, auto wiping system removes metal filings.
- High precision. The whole machine must be processed by gantry milling to ensure high precision performance. High quality guides rail and transmits gear.
- Available for the different distance of holes notching.
- Hydraulic driven, step-less pressure regulation
- One set of notching machine can be used for different shapes of holes notching, by replacing customized notch and die set.
- Manual feed for easy maintenance and cheap notching machine consideration.
- Durable hydraulic cylinder, best quality hydraulic hose.
- notch and die set was made by SKD11 with a temper.
- 12 months warranty for notching machine.
